

GLASS BEAD PLASTER REPAIR KIT

A Do It Yourself Pool Patch Repair Kit

POOL PATCH INSTRUCTIONS

1. Lower water below repair area.
2. Remove loose cement and chip the area straight down with no beveled or angled edges a minimum of a 1/4 inch deep.
3. Add 2 oz. of LIQUID CEMENT BONDER per 1½ lb. of DRY POOL PATCH CEMENT MIX. Add water and mix until a putty consistency is achieved. Use cold water for slower set and warm water for faster set.
- 4a. CRACK REPAIRS - Use a diamond blade angle grinder and saw-cut the crack 3/8" wide by 3/8" deep, then clean out crack area and push POOL PATCH mixed material with rubbing motion deep into crack crevice. Remove excess material from top surface and expose the Glass Beads with a very fine mist then wipe gently with moist sponge to clean.
- 4b. CHIPS OR LARGE AREAS - Trowel POOL PATCH mixed material firmly filling the area. Trowel till the POOL PATCH is smooth and flat. Remove excess from the edges with a moist sponge. After POOL PATCH starts to cure, spray with water using a spray bottle to expose the glass beads. If POOL PATCH has a film after cure time, it can be removed by wetting the surface area with water and pouring a mixture of 1 part muriatic acid to 3 parts water on the patched area. Allow mixture to expose area for 1 minute and rinse off using a water hose.

ALLOW TO CURE 24 HOURS BEFORE FILLING POOL

WARNING: Contains Cement, an Alkaline substance irritating to eyes and skin. Contains Acrylic Resin Cement Bonder. Should product contact eyes, flush them immediately and repeatedly with water and call a Physician. DO NOT TAKE IT INTERNALLY. In case of skin contact, rinse immediately with water. USE OF RUBBER GLOVES AND EYE PROTECTION IS RECOMMENDED.
